Stadtplanung Heute - Stadtplanung Morgen Bornemann, Laura, Gerloff, Sebastian, Konieczek-Woger, Magdalena, Köppel, Jacob, Schmütz, Inken, Timm, Mario, Wilke, Henry, 2017-04-25 Seit dem Bestehen der Stadt- und Raumplanung als eigenständigem Berufsfeld sowie der Gründung der entsprechenden Ausbildungsstudiengänge wird über die Aufgaben der Praktiker-innen, den Stellenwert einer eigenen Disziplin und die Eignung angehender Planer-innen debattiert. Diese Debatte fand mit der im Jahr 2014 veröffentlichten Kölner Erklärung namhafter Praktiker-innen sowie darauf folgender Er widerungen erneut Fahrt auf. Zeitgleich liefen auch innerhalb der Planungsschulen zahlreiche Diskussionen und Novellierungsprozesse zur inhaltlichen Ausrichtung der Ausbildung ab. Den Novellierungsprozess am Institut für Stadt- und Regionalplanung der TU Berlin nahm eine Gruppe von Studierenden zum Anlass, die offene Frage nach den Aufgaben der Planer-innen und der fachlichen Eignung angehender Absolvent-innen im Rahmen eines selbstbestimmten Studienprojekts mittels einer bundesweiten Umfrage unter Praktiker-innen und weiterer Erhebungen erstmalig umfassend zu untersuchen. Dieser Artikel gibt einen Einblick in die Ergebnisse und positioniert sich anhand dieser in der aktuellen Debatte.

STEM to Story 826 National, 2015-01-20 Bring STEM to life for students with zombies, rockets, celebrities, and more STEM to Story: Enthralling and Effective Lesson Plans for Grades 5-8 inspires learning through fun, engaging, and meaningful lesson plans that fuse hands-on discovery in science, technology, engineering, and math (STEM) with creative writing. The workshop activities within the book are the innovative result of a partnership between 826 National's proven creative writing model and Time Warner Cable's Connect a Million Minds, an initiative dedicated to connecting young people to the wonders of STEM through hands-on learning. Authentically aligned with both the Common Core State Standards and the Next Generation Science Standards, this book provides teachers, after-school and out-of-school providers, and parents with field-tested lessons, workshops, and projects designed by professionals in each field. Including reflective observations by arts and science celebrities like Jon Scieszka, Mayim Bialik, and Steve Hockensmith, lessons feature bonus activities, fun facts, and teaching points for instructors at every level. These quirky, exploratory lessons will effectively awaken student imaginations and passions for both STEM and creative writing, encourage identity with scientific endeavors, and make both science and writing fun. Grades five through eight is the critical period for engaging students in STEM, and this book is designed specifically to appeal to - and engage - this age group. The guided curricula fosters hands-on discovery, deep learning, and rich inquiry skills while feeling more like play than school, and has proven popular and effective with both

students and teachers. Awaken student imagination and get them excited about STEM Fuse creative writing with STEM using hands-on activities Make scientific principles relevant to students' lives Inspire students to explore STEM topics further The demand for STEM workers is closely linked to global competitiveness, and a successful future in STEM depends upon an early introduction to the scientific mindset. The challenge for teachers is to break through students' preconceptions of STEM fields as hard or boring, to show them that STEM is everywhere, it's relevant, and it's loads of fun. For proven lesson plans with just a dash of weird, STEM to Story is a dynamic resource, adaptable and applicable in school, after school, and at home.

Work-based learning around the mare balticum . Baltic Sea Academy, Philipp Jarke, Max Hogeferster, 2015-03-19 At the 10th Hanseatic Conference 2015 in Hamburg, representatives from business organisations, academic institutions and policy makers from all countries around the Baltic Sea exchanged their experiences. This book contains the presented papers and a summary of the participants' discussion. Vocational training has dramatically lost its appeal. More and more young people rather opt for study programmes at the university, and refuse to learn practical skills in vocational education. However, the qualifications of the high number of academics do not match the demand of SMEs for skilled workers and entrepreneurs, as their knowledge is mostly theoretical. At the same, due to demographic changes, the number of school leavers in the Baltic Sea Region is declining. Both developments have led to a dramatic shortage of skilled workers and entrepreneurs which is severely limiting growth and innovativeness of SMEs. In order to overcome this crisis, dual vocational training and dual degree study programmes have to be promoted substantially. In dual vocational training enterprises can actively influence and improve the quality of the education their apprentices receive; and in dual degree study programmes students can test and apply their theoretical knowledge, which they acquire at the university, simultaneously in the enterprises. The contributors of this book describe how this reform of education policy can be implemented in practice.
